DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:
2. Please select one of
 - a. FIGS. 1-8; or
 - b. FIG.9-10.
3. Please select one from *each* of the following subspecies (a, b, c, d):
 - a. Terminal end
 - i. Spherical; or
 - ii. flat.
 - b. Terminal end opening
 - i. Formed by a cut
 - ii. Formed by two cuts
 - (1) Each cut is cylindrical and the two cuts are perpendicular
 - (2) Each of the two cuts is v-shaped
 - (3) Each of the two cuts is flat.
 - c. Moving the cutter
 - i. Rotating an inner member to cause off-axis movement of the cutter. The inner member rotates axially and the cutter rotates in a direction perpendicular to the direction of rotation of the inner member;
 - ii. Engaging the cutter and an inner member while rotating the inner member;

Art Unit: 3731

or

- iii. Applying a direct cutting force to tissue with a cutter with a cutter, and mechanically rotating a member to cause off-axis movement of the cutter to end-on cut tissue.
- d. End on cutting tissue
 - i. Abrading tissue; or
 - ii. Slicing, grabbing, and shearing.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3731

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
